Testing of Computer Readable Form Submissions for Applications Containing Nucleotide Sequence and/or Amino Acid Sequence Disclosures

The Patent and Trademark Office (PTO) is interested in identifying participants for voluntary testing of computer readable form submissions in conjunction with the anticipated implementation of the final rules setting forth the requirements for patent applications containing nucleotide sequence and/or amino acid sequence disclosures. The final rules were published in the *Federal Register*, 55 FR 18230 (May 1, 1990), and in the *Official Gazette*, 1114 O.G. 29 (May 15, 1990). The testing of computer readable form submissions will encompass all of the computer readable forms permitted by § 1.824 of the final rules. It is expected that the submission testing will be conducted during the month of July 1990.

Participants in the testing will be able to submit information to the PTO which is related to an actual patent or patent application or which is entirely hypothetical. The confidentiality requirement imposed by 35 U.S.C. 122 will be respected if the submitted information relates to a pending application. A software program for IBM compatible PCs, called "Patentin", that has been developed to facilitate compliance with the final rules, will be available during the testing period. The "Patentin" program has been specifically designed to collect all of the information that is requested by the final rules, in the format required by those rules. The testing of the "Patentin" program will also involve a review of an instruction manual that will accompany the program.

Requests to participate in the testing of computer readable form submissions should be made in writing and addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231, Attention: Lois E. Boland; Special Program Examiner, Office of the Assistant Commissioner for Patents - Crystal Park 2, Suite 919. Any questions about the submission testing should be directed to Lois E. Boland, by telephone, at (703) 557-8384.

Reference Collection of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to libary, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
